[Check All](#) [Uncheck All](#) ☒ Remove Duplicates

Import?	Name	Username	Password	Group	Notes	URL
<input checked="" type="checkbox"/>	aws.amazon.com	abhi	*****	abhi		https://console.aws.amazon.com/console/home?region=us-east-1

It will come as shown in below.

[Check All](#) [Uncheck All](#) ☒ Remove Duplicates

Import?	Name	Username	Password	Group	Notes	URL
<input checked="" type="checkbox"/>	aws.amazon.com	abhi	*****	abhi		https://console.aws.amazon.com/console/home?region=us-east-1

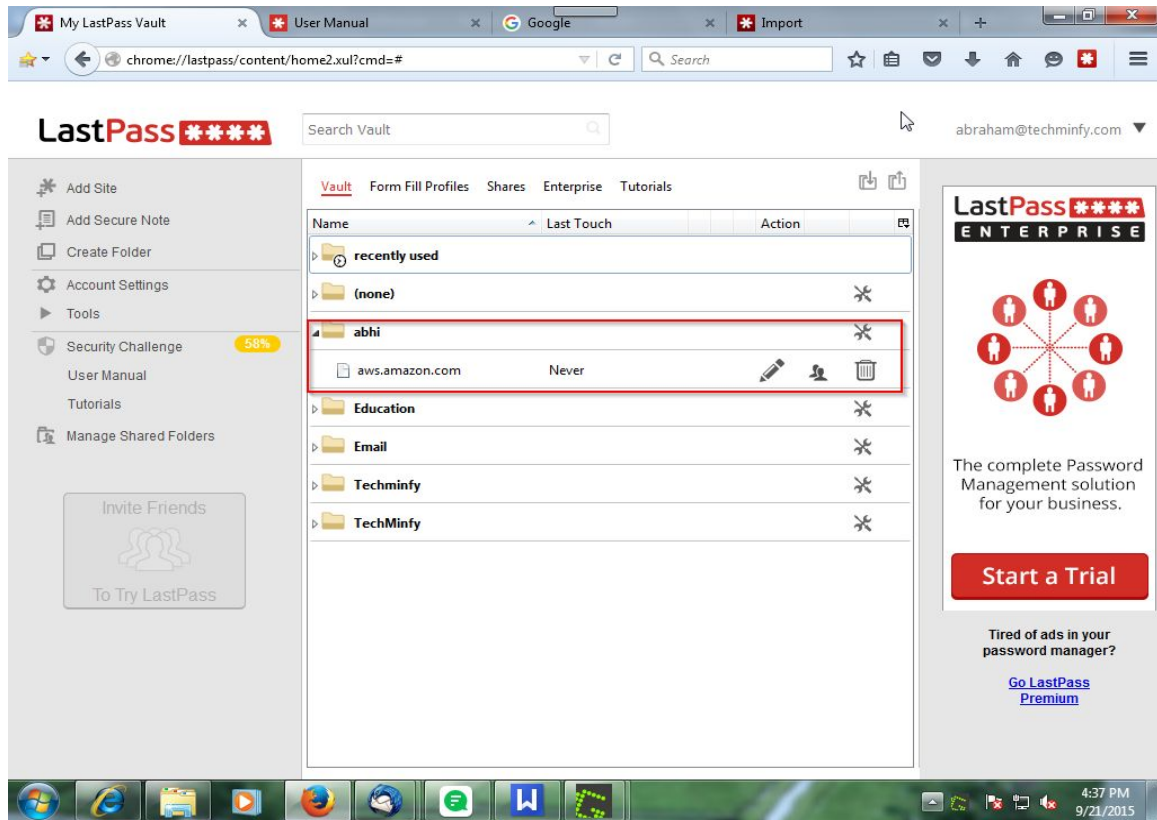

Encrypting 1 of 1 : aws.amazon.com
Importing 1 item.....
Done!

**** If your imported data does not contain the information required to autologin, you may have to use the 'AutoFill' button in the LastPass notification bar the first time you log into the site.
**** This should only be required once per account, and we won't show the bar if there's only one account after this setup.

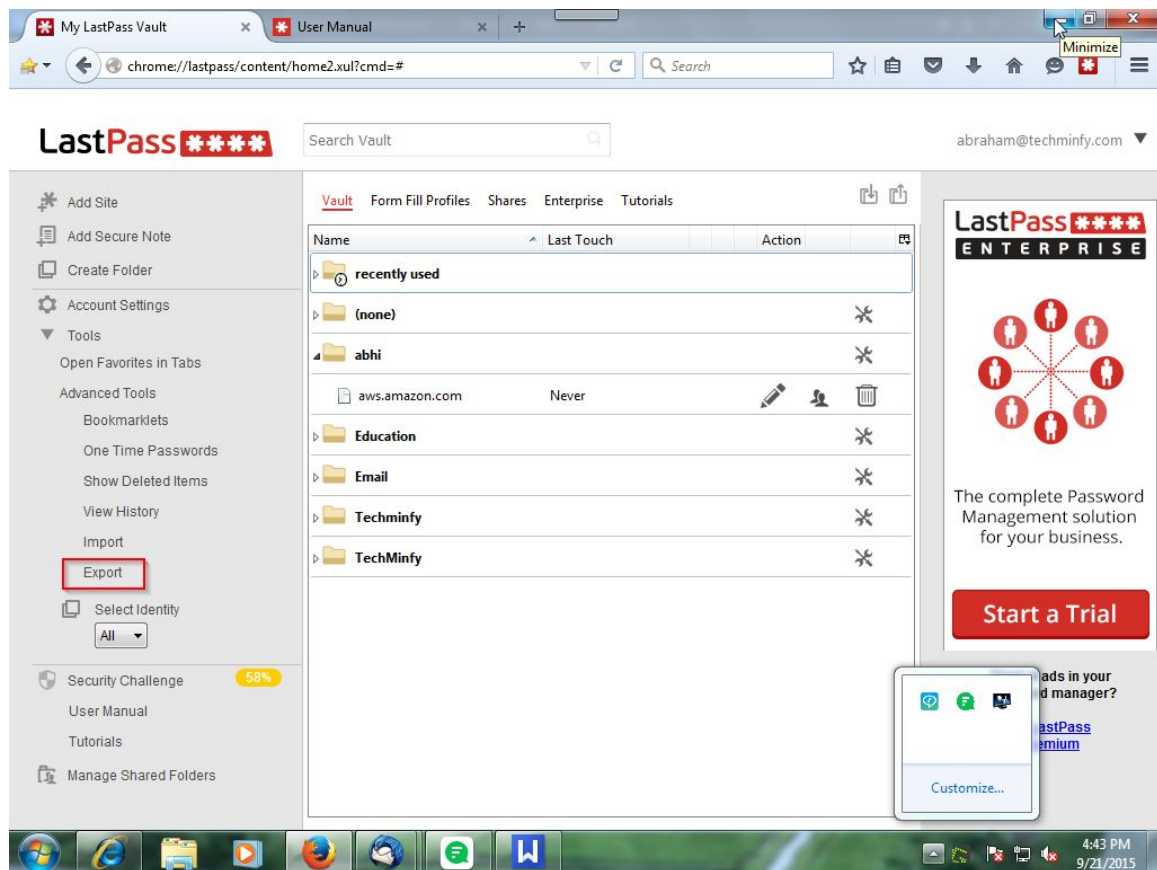

STEP 5: Goto the LastPass site console and check is it imported or not.

Yes It has been Imported. Here we can share the site to our friends by clicking share symbol.

How to export .CSV files here.
